Rinse with plenty of water immediately, also under the eyelids, for at least 15 minutes. Remove contact lenses, if applicable. Consult an ophthalmologist immediately.

After ingestion

Immediately give large quantities of water to drink. Do not induce vomiting. In the event of spontaneous nausea and unconsciousness, keep the head back and bring the patient into the recovery position. Keep the respiratory tract open, prevent aspiration. Lay the affected person down, and keep her or him warm and calm. Consult a physician.

The release of the following substances is possible in a fire: carbon dioxide (CO₂), carbon monoxide (CO), smoke, nitrogen oxides (NO_x).

The inhalation of hazardous decomposition products may cause serious health damage.

5.3. Advice for firefighters

Wear self-contained breathing apparatus for fire fighting, if necessary.

Additional information

The combustion gases are partially condensed with the water used to extinguish the fire and end up as a contaminant in this water.

Do not let product enter drains.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Evacuate personnel to a safe area. Provide good ventilation. Do not breathe in vapours and mist. Use personal protective equipment.

Slipping hazard due to leakage. Avoid bringing product in contact with the skin.

6.2. Environmental precautions

May not end up in waste water or open waters. Entry into rivers or surface water is to be prevented by the erection of barriers made of sand or earth or by other suitable barriers. Contact the responsible authority immediately if the product ends up in the soil, a body of water, or the sewer system.

6.3. Methods and material for containment and cleaning up
