4.1. Description of first aid measures**General information**

Show this safety data sheet to the doctor in attendance. Never give anything by mouth to an unconscious person. Lay the affected person down and keep him still; If unconscious, place the person in the recovery position.

After inhalation

Move to fresh air. Lay the affected person down, and keep her or him warm and calm. If symptoms persist, call a physician. In case of irregular breathing or respiratory arrest: Oxygen or artificial respiration, if needed.

After contact with skin

Wash contaminated skin areas thoroughly with soap and water. Remove soiled clothing.

Do not use solvents or thinners.

Obtain medical attention.

After contact with eyes

Rinse with plenty of water immediately, also under the eyelids, for at least 15 minutes. Remove contact lenses after the first 1 - 2 minutes and continue flushing.

Consult an ophthalmologist immediately.

After ingestion

Rinse mouth, spit liquid out. The affected person should slowly drink one glass of water. Do not induce vomiting.

In the event of spontaneous nausea and unconsciousness, keep the head back and bring the patient into the recovery position. Keep the respiratory tract open, prevent aspiration. Lay the affected person down, and keep her or him warm and calm. Consult a physician.

4.2. Most important symptoms and effects, both acute and delayed

May cause eye/skin irritation.

nausea, vomiting, cough, shortness of breath, abdominal pain.

The release of the following substances is possible in a fire: carbon dioxide (CO₂), carbon monoxide (CO), smoke, nitrogen oxides (NO_x).

The inhalation of hazardous decomposition products may cause serious health damage.

5.3. Advice for firefighters

Do not breathe in the vapours and combustion gases. Wear self-contained breathing apparatus for fire fighting, if necessary.

Additional information

The combustion gases are partially condensed with the water used to extinguish the fire and end up as a contaminant in this water.

Do not let product enter drains.

Appropriate engineering controls

Ensure adequate ventilation, especially in confined areas. This can be achieved by local or space exhaust. If this is not sufficient, in order to hold the solvent vapour concentration lower than the occupational exposure limit an approved respiratory protection apparatus must be worn.

Protective and hygiene measures

Avoid contact with skin and eyes. Do not breathe in vapours or spray mist. Remove and wash contaminated clothing before re-use. Do not eat, drink, smoke or take snuff at work. Wash hands before breaks and immediately after handling the product. Keep away from food, drink and animal food stuffs.

Eye/face protection

Preventive skin protection: skin protection cream.

Skin protection

Impervious clothing, boots, apron, protective gloves.
Take off all contaminated clothing immediately. Wash contaminated skin areas thoroughly with soap and water.

Respiratory protection

When workers are facing concentrations above the exposure limit, they must use appropriate certified respirators. In order to avoid inhalation of spray-mist and sanding dust, all spraying and sanding must be done wearing adequate respirator.
